Portfolio: [Add Link] Live Project Demo: [Add Link]

SKILLS

- ❖ **Languages:** Java, JavaScript
- ❖ **Web/Backend:** HTML, CSS, Bootstrap, React.js, Next.js, Node.js, Express.js, TypeScript
- ❖ **Databases & Tools:** MySQL, MongoDB, Git/GitHub, REST APIs, Automation Workflows

EDUCATION

- ❖ BSc (CSE) | Uttara University (UU) CGPA: 3.50 | (Jan '2022-Dec'2025)
- ❖ XII (HSC) | Monipur Uchcha Vidyalaya & College (MUBC) 70% | 2020
- ❖ X (SSC) | Doctor Muhammad Shahidullah School (DMSAUMB) 79% | 2018

PROJECTS

❖ Premium Developer Portfolio | Next.js, TypeScript

Live Site: [Add Link]

- Engineered a high-end, scroll-driven portfolio using Next.js 15 and TypeScript, featuring an iOS-26-inspired "liquid glass" UI and a 5-zone adaptive layout that responds fluidly across devices.
- Built custom scrollytelling interactions (pinned sections, scroll-linked content transitions, animated counters) inspired by premium product sites, improving engagement and perceived polish.
- Replaced Tailwind with pure CSS custom properties to resolve grid-layout conflicts, and implemented a signature 'code-editor gutter' scroll-progress indicator.

❖ DermaScan – AI-Powered Skin Disease Detection System | MERN Stack, Machine Learning

Live Site / Repo: [Add Link]

- Developed a full-stack web platform that lets users upload skin images and receive instant, AI-assisted predictions for common skin conditions using a trained image-classification model.
- Built a React.js frontend for image upload and result visualization, with a Node.js/Express.js backend exposing REST APIs to serve model predictions and store user history in MongoDB.
- Designed the system with a clear disclaimer and doctor-recommendation flow, prioritizing responsible use of AI in a healthcare-adjacent context.
- Optimized image handling and API response times to keep prediction turnaround fast on low-bandwidth connections common in the target market.

❖ StyleNest – Men & Women Fashion E-commerce Platform | MERN Stack, Automation

Live Site / Repo: [Add Link]

- Built a production-oriented fashion e-commerce platform for men's and women's apparel using the MERN stack, with product catalog, cart, and checkout flows tailored for the local market.
- Automated order confirmation, inventory updates, and customer notifications using workflow automation, reducing manual order-handling effort.
- Implemented secure user authentication and role-based access (admin/customer) with Node.js/Express.js and MongoDB for scalable product and order management.
- Designed a responsive, conversion-focused UI/UX to improve product discovery and reduce cart abandonment.

POSITION OF RESPONSIBILITY

❖ Programming Club | Uttara University (July '2025)

Organized hackathons & conducted sessions for 300+ college students on Web Development related topics.

ACHIEVEMENTS

- **Apna College DSA Certification:** Completed comprehensive coursework in Data Structures and Algorithms, enhancing problem-solving and coding efficiency.
- **Apna College MERN Stack Certification:** Gained proficiency in building full-stack applications using MongoDB, Express.js, React.js, and Node.js.

LANGUAGES

- ❖ **Bengali** – Native
- ❖ **English** – Professional Proficiency
- ❖ **Hindi** – Professional Proficiency
